tips for discussing your nausea and vomiting medicine with your doctor, nurse or pharmacist

ALWAYS tell your doctor or nurse if you are still experiencing an upset stomach and are having problems eating.

If your doctor is considering giving you a medicine to relieve your nausea and vomiting, consider the following questions:

- How long will the medicine take to work?
- Will this medicine interact with other medications I am taking?
- Can I take this medicine if I have heart, liver, kidney or other medical conditions?
- How and when do I take this medicine?
- Will this medicine provide 24-hour coverage?
- Does the medicine work through the night?
- What should I do and whom should I contact if my medicine is not working?
